

## More drilling, less standing time.

Survey every time you pull core with Champ Gyro™ in a Champ OSA™

The Champ OSA (Overshot Assembly) is unique running gear which allows you to run a Champ Gyro survey as you retrieve a core sample. This innovative approach eliminates the need for a separate survey run.

### The Champ Gyro run in a Champ OSA:

- Significantly increases drilling productivity;
- Integrates with any standard overshot and can be run in rod sizes from B to P;
- Allows for wireless data download at surface; and
- Enables the driller to confidently run surveys without complex and time consuming setup procedures.
